PROFESSIONAL SUMMARY

Flutter and Android developer with a Bachelor of Information Technology (Islamic University of Gaza, 2026, 90% GPA, ranked 2nd in class). Builds complete mobile applications, from team-based marketplace and delivery apps to booking, store and notes apps, using Flutter, Dart, GetX and Firebase, working from Figma designs and API specifications. Completed TAQAT's 36-hour *AI Coding: Advanced* program and works with AI coding tools, MCP servers and agent skills to deliver professional-quality results faster. Collaborates with teams through Git and GitHub.

Core Competencies: Flutter & Dart • GetX State Management • REST API Integration • Firebase • Figma-to-Code UI Implementation • Git/GitHub Teamwork • AI-Assisted Development (MCP, Agent Skills)

TECHNICAL SKILLS

Mobile & Cross-Platform: Flutter, Dart, GetX, Firebase (Firestore), Android (Kotlin, Java), Swift, Sensor APIs

AI-Assisted Development: Claude Code, MCP (Model Context Protocol), agent skills, AI agents and sub-agents for workflow automation; connecting Google Forms/Sheets, Figma and Canva into development workflows

APIs & Architecture: REST APIs (Postman, OpenAPI/JSON), Design Patterns (MVC, Factory, Strategy, Singleton, Decorator), Data Structures & Algorithms, OOP

UI/UX Design: Figma, Adobe XD, Canva, Wireframing & Prototyping, Usability Testing

Tools & Version Control: Git, GitHub (branching, pull requests, team collaboration), Android Studio

Web & Networking: HTML5, CSS3, JavaScript; Computer Networks (IP/VLSM, DHCP, NAT, OSPF, EIGRP)

Office & Data: Microsoft Excel, Word, PowerPoint, KoBo Toolbox

Soft Skills: Team Coordination, Problem Solving, Time Management, Critical Thinking, Effective Communication

PROJECTS

Lamha – Multi-Supermarket Delivery App (Team Project, GitHub)

Flutter, Dart, JSON/REST APIs

- Built with a team on GitHub: a central marketplace showing products from multiple supermarkets, with delivery and two roles, customer and driver.
- Developed the complete driver module: dashboard with online/offline status, available orders and order acceptance, current delivery details, delivery status updates with OTP/photo confirmation and location updates, delivery history and earnings summary.
- Followed the shared project structure, integrated UI with JSON data, tested the full driver journey, and presented the app to project supervisors and professionals.

anaqa (Dori) – Barber Reservation App

Flutter, Dart, GetX

- Implemented the app from a Postman API collection and a Figma UI/UX design, using GetX for state management.
- Built the entry flow: splash screen using the ping and place-info API endpoints, no-connection error with retry, and login and registration screens.

Rivo Store – Electronics Store App

Flutter

- Complete store app for electronic goods such as laptops and computers.
- Redesigned the UI with an iOS-style look based on the RIVO brand colors, applying the ui-taste design skill.

Notely – Notes App

Flutter, Firebase Cloud Firestore

- Notes app with create, edit, delete, pin and search, color-coded notes and cloud storage in Firestore; UI redesigned with the ui-taste skill.

Home Services – Android Application

Kotlin, Firebase, Android Studio

- Marketplace connecting homeowners with service providers (carpentry, electrical and more): add/update/delete providers and services with images, map routing between homeowner and provider, search by name and filtering.

Graduation Project – Mobile Mini Lab

Mobile learning app (Java)

- Mobile app that lets university students learn and practice Java from a phone: interactive lessons, code editor with syntax highlighting, online code execution, auto-tested exercises, progressive hints and progress tracking.

Other projects: Saydalyati, a Flutter pharmacy browsing and ordering app with an admin panel (in development); a native Android sensor app using accelerometer and proximity sensors (Kotlin); a Java desktop message encryption tool using a shift cipher.

EXPERIENCE

Program Participant – Future Generations Program

Al Rahma International Association, Gaza

- Coordinated youth development programs, public workshops and community outreach initiatives
- Managed logistics for regional events and facilitated group discussions and ideation sessions
- Developed public communication and content-creation skills while working with diverse audiences

EDUCATION

Bachelor of Information Technology – Mobile Computing and Smart Device Applications

Islamic University of Gaza (IUG) | 2022 – 2026

Ranked 2nd in class • Cumulative GPA: 90%

Relevant coursework: Advanced Mobile Application Development, Software Architecture, Data Structures & Algorithms, Network Administration, UI/UX Design, Operating Systems, Cybersecurity

General Secondary Education Certificate (Tawjihi) – 2022, graduated with distinction: 98.7%

CERTIFICATIONS & TRAINING

- **AI Coding: Advanced** (AI Coding Masters), TAQAT – 36 hours, completed 8 November 2026 (Certificate ID TQ-2026-01155)
- **Claude Code in Action; Introduction to Agent Skills; Introduction to Model Context Protocol** – Anthropic, via TAQAT (2026)
- **AI Fluency: Framework & Foundations; Claude with the Anthropic API; Claude Code 101** – Anthropic, via TAQAT (Aug 2026)
- **Flutter Development Program** – Ajyal (participant)
- **Professional Development Workshop Series** (5 days, 5 hours/day) – Ajyal for Training and Development, under PNGO & SDF, supported by UNDP Palestine
- **Git & GitHub Workshop** (5 hours) – Manara
- **English Language Proficiency Certification** – Smart Center (2021–2023) • **Intensive English Training** – English Summer Camp, IUG (2021)
- **First Aid Certification** – Khotwa Center (2022)

LANGUAGES

Arabic – native • English – advanced / professional (reading, writing, speaking)
